What can a loan do for your business?

Business Loans are one of the most cost effective and popular ways to borrow money. They offer the opportunity to borrow money for your business without the requirement to submit property as security.

- Flexible terms - mean you can borrow the money from 6 months to 60 months giving you the control over repayments.
- Lump sum of money - allowing you to finance your business upfront.
- Unsecured lending - means there is no need for collateral; instead your business plan, cashflow, income and business stability will be assessed.
- Competitive rates - business loans have a fixed interest rate which means no change to your repayment amount.
- For any business use - money can be used to boost cashflow, invest in stock and / or equipment, consolidate debts.
- Transparent fees and rates - meaning you know what you're paying right from the start.
- Tax benefits - the interest on business loans is tax deductible.

Over the last few months we've completed on:

£25,000 loan for an IT business who are growing and needed cash to invest in new staff and new equipment;

£55,000 loan for a construction business who are experiencing cashflow issues due to the prolonged inclement weather; and

£95,000 flexible line of credit for a healthcare business which allows them to draw funds and repay them as required within a set limit.

Please pick up the phone or drop us an email if you want to have a chat – we'd love to be able to help you and your business.

Best Wishes

BEN & PAUL
