Over the last month we've seen so many people face to face – it really has been a breath of fresh air. We've attended networking meetings (business focused and social), seen funders, visited customers at their businesses and can definitely feel the air of optimism in the business world. Life is still tough, we're all still adjusting to a new normal post Covid and now events happening across Europe are unsettling but we are here to help you and your business in any way we can. Now is the perfect time to set your plans for the second quarter so please do get in touch if you think we can help.

We've seen an increase in the number of buy to let mortgage enquiries. With the uncertainty around the interest rate and potential increases over the coming months now is a great time to look at a fixed rate. Get in touch to see what your options are and to find out how we can help you.

We're always working alongside and supporting engineering, manufacturing and transport businesses and so far this year we've completed on a number of deals ranging from £10,000 - £580,000. We're excited to have now partnered with HGV World and are able to support their customers in financing their purchases. So if you find yourselves searching for tipper trucks, transporters, plant lorries, recovery trucks or other HGV vehicles you'll see us offering our services there too!

March has brought us '22 plate vehicles and we're delighted to have been able to help customers finance their new cars. Remember we can help with finance for all types of vehicles – both for your business and for your own personal use; new cars, used cars, electric cars, vans, motorhomes and motorbikes.

Get in touch to see how we can help you with your next vehicle.

Need a helping hand with your cash flow? Want a low-cost flexible credit line? With no monthly fees or exit fees we can help you secure funding from £25,000 to £1million. You can borrow or repay as your business needs require. Give us a call today to see how we can help you.
