

It's never too early to start planning – protect yourself now for 2023

November 2022

We know there is uncertainty around interest rates; we know people are cautious about committing to more outgoings but we also know that reviewing your existing expenses may well offer you opportunities to fix costs or extend existing terms at a time when having no surprises is key. Planning early for 2023 will help you stay focussed and keep control of your business costs.

*I've already got a bank manager **and** an accountant. Why do I need a finance broker too?*

- ✓ We've got access to over 65 lenders ... giving you an alternative option to just using your bank.
- ✓ You might be a new business ... we can still offer finance options right for you.
- ✓ There may be a blip in your credit history ... that won't normally stop us being able to offer you solutions.
- ✓ Your business is growing and you need cash quickly ... we can recommend options that will work for you.

Don't forget to review your **Annual Investment Allowance**. If you've got a December year end you've probably already met with your accountant and so now is the time to look at spending your capital so you can benefit from reduced tax liability.

We're continuing to see a growing interest in electric vehicles. Not only can we help you find your vehicle and fund it but we can also work with you to fund any charging points for your business too.

Give us a call **today**; we'd love to hear from you.
